Empathy Map

Create an empathy map to understand the customer/user from four perspectives — what they Say, Think, Do, and Feel — in relation to the problem addressed by the project. This helps the team build a customer-centric solution.

SAYS • "I don't understand some of the legal terms." • "I want a simple explanation of this document." • "I need to know the important clauses before I use it."		THINKS • "Is there anything important that I might miss?" • "The document is too difficult to understand." • "I want to check the document without depending on someone every time."
	PERSONA NAME Legal Document User (Role / User Type) General User / Non-Legal Professional	
DOES • Uploads or checks the legal document. • Reads the document and looks for important clauses. • Searches for the meaning of unfamiliar legal terms.		FEELS • Confused when reading complex legal language. • Worried about missing important terms or conditions. • More confident when the document is explained in simple language.
