Project Name	LegalEase AI
Maximum Marks	5 Marks

Problem-Solution Fit Canvas

The canvas below connects the user's problem, current difficulties, available alternatives, and the proposed LegalEase AI solution.

1. Customer Segment(s) [CS] General users and non-legal professionals who need to prepare or understand basic legal documents.	6. Customer Limitations [CL] - Limited legal knowledge - Legal language can be difficult to understand - Manual document preparation takes time - Users may not know which terms or details to include	5. Available Solutions [AS] - Manually writing documents - Copying and editing existing templates - Asking a legal professional for help - Searching online for document formats
2. Problems / Pains + Frequency [PR] - Difficulty preparing a suitable legal document - Confusion about legal terms and conditions - Repeated manual editing and formatting - High frequency when users need documents for common situations	9. Problem Root / Cause [RC] Users may not have legal drafting knowledge, and preparing a document manually requires time, suitable wording, and careful checking of details.	7. Behavior + Its Intensity [BE] Users search for templates, copy existing terms, edit them manually, and review the document before using it. The effort is high when the document needs many changes.
3. Triggers to Act [TR] - Need to create a legal document - Need to prepare a document quickly - Need to organize user-provided terms and details - Want a simpler document-generation process	10. Your Solution [SL] LegalEase AI provides a simple AI-assisted document generation flow. The user selects a document type, enters the required details or terms, generates the document using Gemini, reviews/edits the result, and exports it as TXT, DOCX, or PDF.	8. Channels of Behavior [CH] Online: - Web-based Streamlit interface - Project application Offline: - Saved exported documents for later use
4. Emotions Before / After [EM] Before: Confused, unsure about wording, and concerned about spending time preparing the document. After: More confident after generating, reviewing, editing, and exporting the document through a guided workflow.		

Key Fit: LegalEase AI addresses the user's need for a faster and simpler way to prepare basic legal documents by combining guided user input, AI-assisted generation, review/editing, and document export.
