

No. of Functional Features Included in the Solution

Date	29 September 2026
Team ID	SWTID-2026-7995
Project Name	LegalEase AI
Maximum Marks	5 Marks

Functional Features Included in LegalEase AI

The following features represent the implemented functional workflow of LegalEase AI. Only features relevant to the project are included.

S.No.	Functional Feature	Description	Input / Action	Output / Result	Status
1	Document Type Selection	Allows the user to select the type of legal document to be generated.	User selects a document type.	Selected document type is used for the generation request.	Implemented
2	Details / Terms Input	Allows the user to provide the information and terms required for the selected document.	User enters relevant details or terms.	User-provided information is prepared for generation.	Implemented
3	AI-Assisted Document Generation	Generates a draft legal document using Gemini based on the selected document type and user input.	Document type + user details / terms.	Generated legal document draft.	Implemented
4	Review and Edit	Allows the user to review the generated content and make necessary edits before export.	Generated document content.	Reviewed and edited document.	Implemented
5	Document Export	Allows the user to save the reviewed document in supported output formats.	Reviewed document.	TXT, DOCX, or PDF file.	Implemented

Feature Summary

Metric	Value
Total Functional Features	5
Implemented Features	5
Pending Features	0

Note: The generated legal document is a draft based on the information supplied by the user. Users should review the content before using it and seek appropriate professional legal advice when required.
