

Demonstration of Proposed Features

Date	30 September 2026
Team ID	SWTID-2026-7995
Project Name	LegalEase AI
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document records the key features implemented in LegalEase AI and prepared for project demonstration. The application supports AI-assisted legal document drafting through a Streamlit frontend, FastAPI backend, and Google Gemini integration, together with document review and export capabilities.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Document Type Selection	Allows the user to select the type of legal document to generate.	Implemented	Yes	Available in the Streamlit application.
2	Legal Document Generation	Generates a legal-document draft from the provided parties, terms, and effective date using the backend and Gemini.	Implemented	Yes	Core document-generation feature.
3	Document Review & Editing	Provides the generated document for review and editing before export.	Implemented	Yes	Supports user review before download.
4	TXT / DOCX / PDF Export	Allows the generated document to be exported in TXT, DOCX, and PDF formats.	Implemented	Yes	Multiple output formats are supported.
5	Structured Document Formatting	Applies structured formatting to the generated document for clearer presentation.	Implemented	Yes	Used during document formatting and export.
6	API-Based Backend Integration	Connects the Streamlit frontend with FastAPI endpoints for document generation.	Implemented	Yes	Backend integration supports the application workflow.
