

# Project Demo Planning

|               |                   |
|---------------|-------------------|
| Date          | 30 September 2026 |
| Team ID       | SWTID-2026-7995   |
| Project Name  | LegalEase AI      |
| Maximum Marks | 1 Mark            |

## Project Demo Planning:

A structured demo plan helps the team present LegalEase AI clearly and systematically. The demonstration covers the project problem, solution overview, application workflow, key features, document generation and export capabilities, followed by a question-and-answer session.

| S.No | Demo Section                     | Description                                                                                                 | Duration (mins) | Responsible Member |
|------|----------------------------------|-------------------------------------------------------------------------------------------------------------|-----------------|--------------------|
| 1    | Introduction & Problem Statement | Introduce LegalEase AI and explain the need for an AI-assisted legal document drafting application.         | 5               | All Team Members   |
| 2    | Solution Overview                | Explain the application architecture, workflow, Streamlit frontend, FastAPI backend and Gemini integration. | 5               | All Team Members   |
| 3    | Live Application Demonstration   | Demonstrate document type selection, entering details, generating the document and reviewing the result.    | 10              | All Team Members   |
| 4    | Export & Key Features            | Demonstrate document editing and TXT, DOCX and PDF export capabilities.                                     | 5               | All Team Members   |
| 5    | Q&A; and Conclusion              | Answer questions, summarize the implemented solution and explain the project outcome.                       | 5               | All Team Members   |

## Demo Flow Summary:

|                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                              |
