

Scalability & Future Plan

Date	30 September 2026
Team ID	SWTID-2026-7995
Project Name	LegalEase AI
Maximum Marks	1 Mark

Scalability & Future Plan:

LegalEase AI is designed as a modular application with a Streamlit frontend, FastAPI backend and Google Gemini integration. Future improvements can focus on handling more users, supporting additional document types, improving document management and strengthening deployment and reliability.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited document types	The current application focuses on the document types implemented for the project.	Medium
2	Single application deployment	Scaling for a larger number of concurrent users may require additional deployment resources.	Medium
3	Limited document management	Future versions can provide persistent storage and organized access to generated documents.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	Backend Scaling	Implemented as a project-scale application.	FastAPI backend can be deployed with additional resources or multiple instances as usage grows.
2	Document Storage	Implemented as a project-scale application.	Introduce structured persistent storage for generated documents and related project data.
3	AI Model Integration	Implemented as a project-scale application.	Support configurable Gemini models and improved generation workflows as requirements evolve.
4	Application Performance	Implemented as a project-scale application.	Improve request handling, validation, error handling and resource management for larger usage.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Expand legal document templates	Future enhancement	Broader document-generation coverage
Phase 2	Persistent document management	Future enhancement	Better organization and retrieval of generated documents
Phase 3	Scalable deployment and performance improvements	Future enhancement	Support for increased application usage
